ServiceNow Sr. Consultant & platform engineer. A decade from helpdesk to enterprise platform work, run in parallel with a relentless building habit.

EXPERIENCE

ServiceNow Sr. Consultant - Cognizant Jan 2025 - Present

Remote

Senior ServiceNow developer at Cognizant. Recent engagement: Playtika (Finance, Compliance and CSM) - built advanced Service Portal widgets and custom pages, implemented complex approval workflows in Flow Designer, and delivered end-to-end ITSM and CSM solutions across Finance, Marketing and IT. Refactored legacy workflows into modern Flow Designer during platform upgrades, ran code reviews for performance and security, and prototyped Virtual Agent / AI-agent and agentic workflows (POC). Years spanning development, administration, team management, and cross-functional stakeholder work give a broad view of platform risk and governance.

Agile

ServiceNow Developer - Kantar Oct 2022 - Feb 2025

Hybrid / Remote - Porto, Portugal

Designed and built custom ServiceNow applications, business rules, client scripts, and Service Catalog items at scale. Built IntegrationHub spokes and Flow Designer automation connecting ServiceNow to external systems via REST-based integrations across enterprise toolchains. Owned full upgrade cycle planning and execution across platform versions. Drove cross-functional requirement gathering across global stakeholders in an Agile/Scrum environment.
